

Family Dermatology-Dr. Vickie Brown, MD

In 1986, Dr. Vickie Brown-a Georgia native-opened her practice in Milledgeville after receiving her medical degree with specialty training in Dermatology from the Medical College of Georgia. She is Board Certified by the American Board of Dermatology, and a Fellow of the American Academy of Dermatology. Her office has been located at 840 West Thomas Street for the past 21 years.

Brown specializes in the comprehensive diagnosis and treatment of problems involving the skin, hair, and nails on patients of all ages. She treats skin infections, rashes, complexion problems, skin cancer, and aging skin. Skin growths including moles, warts, and skin cancer are evaluated and removed with various surgical techniques and procedures.

Treatments offered by Brown and her staff include Sclerotherapy for spider veins and Botox injections for wrinkles, and chemical peels. In addition, the practice offers PUVA and UVB ultraviolet light treatments, and laser hair removal.

Brown's staff are comprised of well-trained specialists including a highly experienced Master Laser Technician from the Southern Medical Lasers out of Columbia, South Carolina. The company provides treatments for photoaging, tattoo removal, wrinkles, brown spots, and scar revision. This group brings the most up-to-date procedures to small practices that would not otherwise offer such services.

Having practiced continuously in Milledgeville for over two decades, Brown has cemented her connection to the local community. She reflects, "It is very interesting to see patients I treated as children now bring their own children in to see me."

She adds, "It has been very rewarding to have my patients' skin issues improve or completely resolve with proper diagnosis and treatment that only a Dermatologist can provide."
